

Family Wise

Family Wise is a new twin track project that provides intensive support to families with primary aged school children experiencing poor outcomes and where parents are struggling financially. This could be due to their ability to gain or engage in employment or low income and debt.

Our Intervention Workers will have a small caseload to enable them to work intensively with both the parents and the children.

Outcomes

We aim to:

- Improve educational engagement
- Improve Health Outcomes
- Engage parents in employment and/or employability support
- Improved financial situation
- Reduction in barriers to achievement
- Increased aspirations

The project is funded through the South Gloucestershire Troubled Families Initiative through the strands of Education and Worklessness.

The project will be working across South Gloucestershire and will be delivered by Southern Brooks Community Partnerships in the North and Community Ignite in the South.

Criteria

Families will be identified initially through FIF (Families in Focus) data and we will work in partnership with primary schools to ensure the most at risk families are supported. The family will need to have the following criterion:

- Concerns around Education for the child
- Unemployment or Financial Difficulties at home
